

## DYNOLYZE CAN HUB 4

- Easy way to add more CAN devices
- Divides your existing CAN line into 3 new connections
- The connectors of the CAN HUB are similar to DTM04-4P, mating connector is DTM06-4S.
- 4 pins: CAN high, CAN low, +12V, ground
- This CAN hub is universal. You can also use it with your motorsport applications!
- Attachment with 2 screws or by using a two-sided tape (flat surface)
- Ambient temperature: -30°C - +90°C
- Weight: 50 g

Pins 1 and 4 for supply (thicker traces), current limit 7,5A

Pins 2 and 3 for CAN, current limit 2,5A

Dynolyze hub dyno pinout:

- 1: +12V
2. CAN high
3. CAN low
4. Ground
