

DYNOLYZE K-TYPE CONVERTER

- K-type thermocouple to analog converter
- Measurement range 0°C to +1000°C
- 1 channel, k-type miniature sensor input
- 3 pin Bosch compact connector, mating connector is male 1 928 403 870 with JPT female pins
- Cold junction compensation
- Supply voltage 5V
- Compatible with Dynolyze hub dynos
- Compatible with common applications like stand-alone ECUs through analog
- Calibration 0V = 0°C, 5V = 1000°C
- Dimensions: 50 mm x 56 mm x 29mm (H)
- Weight: 40 g

You can use this with Dynolyze hub dyno, direct fit to dyno analog cables or use in a car connected to stand-alone ecus through analog input.

Pinout: (connector Bosch compact connector female 1 928 404 227 with JPT male pins)

+5V
